If you’re working in Enterprise Architecture or Tech Innovation, then you’re likely to be under pressure on a daily basis to meet the challenges of digital transformation. Today, your senior executives are expecting you to be leading continuous innovation—to be adaptive and to anticipate—and not to be reactive or behind the curve. You need to quickly map your way to results.

As your enterprise evolves, your senior management may present you with multiple complex initiatives, and you’ll be expected to deliver results and show value almost immediately. With barometerIT’s visual, real-time map of your enterprise, you can better understand impacts, dependencies, and the complexity of relationships across your business and IT environments.

barometerIT:
It’s not just the data—it’s what you do with it.

- Create order from technology chaos with a crowdsourced, multi-dimensional enterprise view
- Forecast changes and challenges; identify, remediate, and minimize roadblocks and risks
- Explore application and resource utilization, rationalize portfolios, and test alignment
- Create visibility into new opportunities for growth and streamline the innovation process
barometerIT’s EPM solution can help accelerate the following initiatives:

- Merger or Acquisition
- Business Restructuring
- Technology Rationalization
- Outsourcing / Insourcing
- IT Modernization
- Service Management Implementation

Why you should use barometerIT:

**Top-down, bottom-up view of your enterprise**
- Improves alignment and impact analysis: what needs to change, what works together
- Top-down: inform strategic decisions and program management
- Bottom-up: improves knowledge management and knowledge sharing

**Crowdsourcing of data**
- Collaborative way to get accurate data into one location
- Alleviates data input strain, minimal impact on resources
- Provides visibility and accountability, accelerates and improves decision making

**Enterprise/application portfolio map of relationships and interdependencies**
- Gain transparency from shared knowledge
- Accurately manage integrations of applications and services
- Report on impact analysis, business capabilities

**Configurability and flexibility**
- Adaptable, configurable, versatile system with easy-to-use interface
- Caters to different portfolio and application use cases and tools

**The only EPM + APM integration tool in existence**
- This “pure play EPM” was designed as an EPM solution that includes APM
- Fully relational

**Open, exposed API**
- Leverage existing business intelligence and service management tools to drive insights
- Secure

About barometerIT
barometerIT by Changepoint brings unique clarity to your biggest business challenges by providing an “up-to-date blueprint” of your business and IT environment. Help leaders reclaim creative, future-oriented work by reducing the time necessary to support portfolios. Generate actionable information and identify redundancies, streamline processes, rationalize systems, and most importantly, make decisions using real-time information. With barometerIT, create visibility into new opportunities for growth and streamline the innovation process.
