

Mobile capabilities for services organizations are critical. Consultants, project managers, executives, and others need easy access to key services information whenever they need it, regardless of what device they're using.

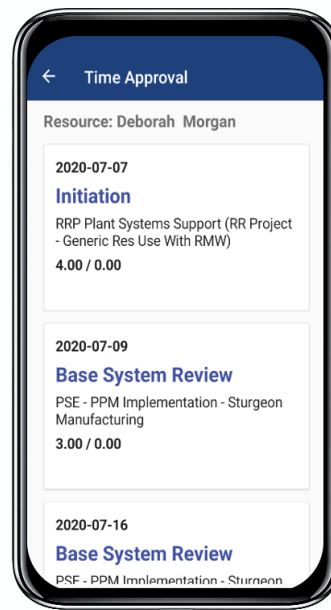

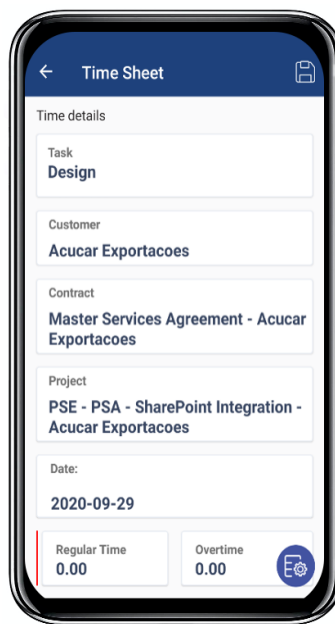

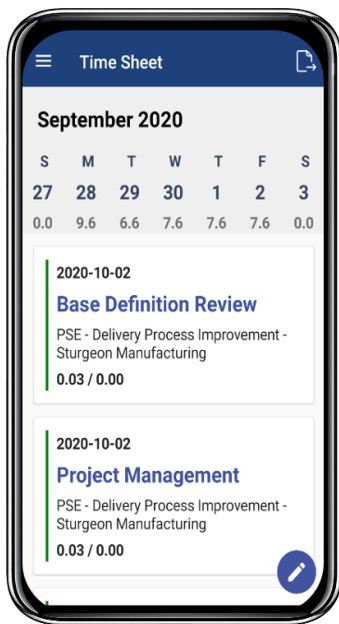

The Changepoint Mobile application is an enhanced, highly intuitive mobile application that makes it fast, easy, and efficient to perform important services tasks - right from the palm of your hand.

Built for iOS and Android smartphones and tablets, Changepoint Mobile's simplified navigation and overall visual appeal empower services teams with the ability to reduce revenue leakage while ensuring fast, accurate billing - online or offline.

Streamline Services Efficiency with:

- ✓ **Higher end-user adoption:**
Intuitive experience that streamlines ease of use
- ✓ **Reduced financial gap:**
Accurate time and expense entry for faster revenue recognition
- ✓ **Better organizational efficiency:**
Data captured and submitted directly into Changepoint Services Automation

Changepoint Mobile has the capabilities services teams appreciate:

- Project, non-project, and request-based time entry
- Expense attachments and report submission
- Time and expense approval
- Offline access, no connection needed
- Consistent experience across mobile devices and tablets
- Push Notifications keep you connected with messages in real-time
- Multi-language localization (English, French, German, Dutch, Spanish, Italian, Brazilian Portuguese)
